Organization	Role	Duration
Reality-Craft Private Limited	Power Platform & SharePoint Developer	May 2022 – Present
TCS	IT Analyst	Aug 2016 – Apr 2022
Binary Republik	SharePoint Developer	Sep 2014 – Aug 2016
Arraycom (India) Ltd.	Junior SharePoint Developer	Apr 2013 – Aug 2014

CERTIFICATES

- PL-900 Microsoft Power Platform Fundamentals
- PL-100 Microsoft Power Platform App Maker
- PL-200 Microsoft Power Platform Functional Consultant
- PL-400 Microsoft Power Platform Developer Associate

PROJECTS

Project #1: NAB (National Australia Bank)
Period: 1 May 2022 to Current
Role: SharePoint/Power Platform Developer
Responsibilities:

- In my role as a SharePoint and Power Platform Developer at Reality-Craft, I have had the privilege of collaborating closely with clients, particularly within the finance sector, to assess their unique business needs and craft tailored SharePoint and Power Automate solutions to address their objectives.
- My responsibilities have encompassed a comprehensive understanding of clients' business operations, examined existing processes, and identified areas for enhancement and automation. To fulfill these needs, I've designed and implemented robust SharePoint architectures, focusing on server infrastructure, security protocols, and governance frameworks.
- I've also taken the lead in guiding development and support teams, adeptly removing impediments that hinder progress. This includes spearheading initiatives such as deploying Microsoft Teams and OneDrive, orchestrating the transition from SharePoint 2013 to SharePoint Online for enterprise-wide adoption, revamping corporate intranet structures, and implementing workflow automation through Power Automate and Power Apps.
- As a SharePoint specialist, I've overseen seamless migrations from on-premises to cloud environments, devising meticulous migration strategies encompassing content analysis, mapping, and meticulous planning. Additionally, I've been entrusted with managing Compliance Purview Policy to ensure strict adherence to legal and regulatory standards, particularly in matters of retention, disposition, holds, and discovery.
- Implemented SPFX web parts for Employee spotlight and employee recognition.
- Designed the Dataverse table structure with proper relationship and Implemented Modal Driven Application to track various threat attacks and sequences for NAB.
- Migrated SharePoint designer flows into Power Automate flows.
- Created Scheduled flows to send periodic email reminder using Power Automate.
- Integrated Salesforce, SharePoint and SQL using Power Automate and Power BI.
- Worked on Power BI report to show data from 3 different SharePoint lists.
- Followed Healthy ALM process for all Power Platform component using GitHub and Azure DevOps pipeline.

Project #2: Johnson & Johnson Services Inc
Period: 1 March 2019 to 30 April 2022
Role: SharePoint/Power Platform Lead
Responsibilities:

- Served as the SharePoint Lead at Tata Consultancy Services, overseeing a team of SharePoint developers responsible for creating and implementing custom solutions for a prestigious client. This involved managing the development, implementation, maintenance, and optimization of the client's SharePoint 2013 and SharePoint Online environments, both of which were among the largest SharePoint farms within our organization.
- Led IT operations projects utilizing the waterfall methodology, actively participating in every stage of the software development lifecycle, from gathering requirements and designing solutions to testing and deployment, ensuring seamless execution and project delivery.

- Played a pivotal role in designing and developing Power Apps, Power Automate, and Power BI solutions to streamline and automate various business processes. Conducted thorough code reviews and provided valuable insights to maintain the highest standards of quality.
- Provided comprehensive support for SharePoint Online administration and external sharing, including configuring site collections, managing user permissions, and establishing external sharing policies to facilitate efficient collaboration while maintaining stringent security measures.
- Conducted code reviews to ensure adherence to best practices and high-quality standards. Analyzed the existing InfoPath form and converted it into Canvas Power Apps application.
- Implemented Power Apps for the recertification process, which could be reused twice a year
- Designed the Microsoft Dataverse table structure for the vendor invoice submission application and created a Modal Driven Application.
- Implemented various publishing pages and web parts using SharePoint REST API, Angular JS, jQuery, and JavaScript.
- Worked on a provider-hosted app and deployed it on the on-premises server.
- Developed Power Apps for the Cost Calculator using standalone Canvas application.
- Created a Power BI dashboard to display data from Azure SQL.
- Involved in deployment admin manual and user guideline document creation.
- Developed a console application to send weekly email notifications and integrated it with Windows Task Scheduler.

Project #3: NBCUniversal Media, LLC
Period: 01 May 2018 to 28 February 2019
Role: SharePoint Developer
Responsibilities:

- Involved in analysis and development parts of applications.
- Migrated existing file share libraries to SharePoint Online (Office 365) using ShareGate tool.
- Migrated existing file share libraries to OneDrive for Business using ShareGate tool.
- Created Process Integrity application using Power Apps Canvas application.
- Converted all SharePoint Designer workflows to Power Automate workflows.
- Created homepage web part using SharePoint REST API and jQuery.
- Created SharePoint Utility using Visual Studio 2017 to extract CSV files of files/folders metadata and permission details.

Project #4: Kroll Information Assurance, LLC
Period: 1 October 2017 to 30 April 2018
Role: SharePoint Developer
Responsibilities:

- Involved in the analysis and development part of applications.
- Migrated an existing SharePoint 2007 site to SharePoint Online (Office 365) using the Content Matrix tool.
- Re-engineered an existing complex web part using SharePoint REST API and jQuery.
- Created the Bravo rewards point application using Power Apps canvas application.
- Developed a provider-hosted app to meet elevated privileges requirements in SharePoint Online.

Project #5: Johnson & Johnson Services Inc
Period: 26 August 2016 to 30 September 2017
Role: SharePoint Developer
Responsibilities:

- Involved in the early stages of projects, participating in requirements gathering and design phases. Primary responsibility was to develop and maintain SharePoint solutions, including custom web parts, workflows, and event receivers. Worked on several projects, ranging from creating new SharePoint sites, lists, and workflows to enhancing existing ones.
- Involved in the analysis and development part of applications.
- Implemented various publishing pages and web parts using Angular JS, jQuery, and JavaScript. Involved in deployment admin manual and user guideline document creation.

Project #6: Binary Republik
Period: September 2014 to August 2016
Role: SharePoint Developer
Responsibilities:

- Responsible for providing technical expertise and guidance throughout the requirements gathering and design phases of various projects, focusing on effective and efficient solutions for clients in industries such as pharmaceuticals and finance.
- Developed custom SharePoint solutions, including web parts, workflows, and remote event receivers, for multiple clients.
- Collaborated closely with SharePoint leads and architects to ensure adherence to design and development standards, and maintained documentation related to SharePoint design and development processes.
- Involved in the analysis and development part of applications.
- Created publishing page layouts to implement module pages for various sub-sites.
- Implemented various publishing pages using jQuery and JavaScript.
- Implemented SharePoint Designer 2013 workflows on document libraries.
- Involved in the creation of deployment guideline documents and user guideline documents.

Project #7: Arraycom (India) Ltd
Period: April 2013 to August 2014
Role: Junior Software Developer
Responsibilities:

- Developed and maintained documentation related to SharePoint development processes, ensuring that information was readily available to colleagues.
- Involved in the analysis and development part of applications.
- Developed a portal using tiered architecture, jQuery, and Ajax toolkit.
- Participated in database design and development of stored procedures.
- Deployed applications in IIS at client locations. Responsibilities:
